

WORLDWIDE LEADER IN DEDICATED CLOUD AND MANAGED SERVICES

ABOUT US

VPLS is a worldwide leader in dedicated cloud and managed services, hosting well over 15,000 servers and 5 million websites. We offer the latest in technology services with affordable pricing to businesses of all sizes throughout Southern California and Hawaii. We are also a full-service Managed Services Provider offering Backup and Disaster Recovery services. VPLS was proudly recognized as both a CRN 2018 Tech Elite Solution Provider and a CRN 2019 Top Managed Service Provider; honors reserved exclusively for those who are amongst the highest achieving solution providers in vendor certifications.

BACKUP & RECOVERY

VPLS provides offsite replication services to clients to enhance data protection and disaster recovery solutions.

CYBERSECURITY

VPLS's Managed Security allows businesses to gain greater visibility into their network to detect and respond to attacks faster with better intelligence.

FIREWALL

A firewall is any business' first line of defense against hackers and other unauthorized external users. VPLS implements Fortinet's web security solution to provide maximum protection for our clients.

CLOUD

By backing up to the cloud, businesses become substantially less vulnerable to cyber attacks. VPLS is one of the most trusted hosting companies when it comes to managing cloud backups with more than 5 million website clients worldwide.

MANAGED SERVICES

Many businesses are choosing to outsource their IT Support to VPLS' professionals rather than retaining in-house IT support. Whether it be costs, frustrations, or simply because it's one less matter to worry about, VPLS's Managed Services has you covered.
