

VPLS MANAGED SECURITY - FINANCIAL SERVICES

ALLOWING ORGANIZATIONS GREATER VISIBILITY INTO THEIR NETWORK

SOLUTION

Having managed Security Information and Event Management (SIEM) services by VPLS at your financial firm ensures safe and reliable cybersecurity for your users. Our managed SIEM services record all suspicious activities, such as multiple login attempts and any sign of malware related activity, and alert our engineers to take immediate action. Our engineers will regularly monitor and test your network for weak access points to prevent cybercriminals from gaining access to your company financial statements as well as your clients' account information. In addition to protecting your firm's network against new threats and unexpected breaches, VPLS's managed SIEM services will also help you with the following:

- ▼ Identify potential vulnerabilities that may cause immediate damage
- ▼ Strengthen access points throughout your network to ensure optimal protection
- ▼ Prevent serious data loss caused by human error and oversight
- ▼ Assist your financial institution in achieving and maintaining regulatory compliance

VPLS's team of engineers are highly skilled and experienced in cybersecurity solutions to provide only the most reliable and professional managed SIEM services for your financial firm, so contact us today!
