

The background of the top half of the page features a network diagram with glowing nodes and connecting lines, overlaid on a photograph of three business professionals (two men and one woman) in a modern office setting, looking towards the network visualization.

# VPLS MANAGED SECURITY SOLUTION

## ALLOWING ORGANIZATIONS GREATER VISIBILITY INTO THEIR NETWORK

### SOLUTION

Having managed Security Information and Event Management (SIEM) services by VPLS at your organization ensures safe and reliable cybersecurity for your users. Our managed SIEM services record all suspicious activities, such as multiple login attempts and any sign of malware related activity, and alert our engineers to take immediate action. Our engineers will regularly monitor and test your network for weak access points to prevent cybercriminals from gaining access to your company's valuable information. In addition to protecting your organization's network against new threats and unexpected breaches, VPLS's managed SIEM services will also help you with the following:

- ▼ Identify potential vulnerabilities that may cause immediate damage
- ▼ Strengthen access points throughout your network to ensure optimal protection
- ▼ Prevent serious data loss caused by human error and oversight
- ▼ Assist your organization in achieving and maintaining industry-standard compliance

VPLS's team of engineers are highly skilled and experienced in cyber-security solutions to provide only the most reliable and professional managed SIEM services for your business, so contact us today!
