

VPLS MANAGED CLOUD FOR HEALTH CARE

MAKING THE MOVE TO THE VPLS CLOUD

SOLUTION

For all Health Care professionals whose goal is to provide the best data security and internet services for their facilities, VPLS's managed cloud solutions can help achieve just that. If your facility uses internet to support staff members' work as well as power medical office essentials, our managed cloud services will supply uninterrupted connection to firewall protected internet free of rolling brownouts, blackouts, and power spikes. Cloud migration is also the perfect way to store and secure your patients' confidential data without you having to expand your real estate or look for another location. Our off-premise data centers are set up with industry standard air-cooling and are highly protected with multiple secured entry-points. In addition to offering your health care facility with top-notch internet and data storage services, VPLS's managed cloud solutions also provide you with the following:

- ▼ Colocation services for your physical servers
- ▼ Backup and disaster recovery
- ▼ Clear communication every step of the migration process - you will know what to expect from the beginning through completion
- ▼ Assist your facility in achieving and maintaining HIPAA compliance
- ▼ A tour of our facility to see where your data will be stored
- ▼ Plus peace of mind for your management team!

Our solutions architects are ready to plan a cloud migration strategy fit for your facility, so contact us at VPLS today!
